

Automated Communications Exchange System ACES Release Notes – June 30, 2006

On Friday, June 30, 2006, a new release of ACES was implemented containing three new functionalities within Payroll File Transfer, as listed below.

Changing member earnings in View/Manage Errors

If you change earnings, the following error message has been added for this edit: “You have changed the member earnings; do you need to modify the Member Contribution amount and/or Tax Deferred Member Contribution amount?”

Adding a payroll record after Transmit File

After you click “Transmit File to CalPERS,” you will be required to answer whether or not you would like to **add** a payroll record. If a selection is not made, a message will appear indicating that you must select “yes” or “no.”

The sequence of the ACES Payroll edits has been modified

The sequence of the edits where ACES checks the accuracy of payroll records has been modified. ACES will validate the active PERS appointment criteria prior to completing edits for proper coding of the payroll fields.
